FULL STACK WEB DEVELOPER

PROFILE

Full Stack Web Developer with 5+ years of experience developing and deploying web applications for the North Sulawesi Provincial Government, with expertise in front-end, back-end, and database development. Built a Python-based AI application for automated background removal and bulk processing of 10,000+ employee photos, and a batch-processing system for generating QR-based employee ID cards at scale. Experienced in delivering practical, efficient solutions for real-world organizational needs.

WORK EXPERIENCE

Full Stack Web Developer (2021-2026)

North Sulawesi Provincial Government

- Developed, maintained, and enhanced web applications to meet organizational requirements and business needs.
- Wrote complex SQL queries joining multiple tables to consolidate and retrieve unified employee data (10,000+ records) for reporting and application use.
- Built a batch-processing application to generate and process QR-based employee ID cards for 10,000+ employees, replacing a manual one-by-one workflow and significantly reducing processing time.
- Built a Python-based AI application to automatically remove backgrounds from 10,000+ employee photos in bulk (processing up to 2,000 images per batch), with reliable output quality even for lower-resolution or slightly blurred images.
- Automated repetitive administrative tasks to improve efficiency and reduce manual workload across departments.

EDUCATION

Bachelor of Engineering (B.Eng.)

Universitas Katolik De La Salle Manado | 2016–2020
Bachelor of Engineering in Informatics Engineering
GPA: 3.46/4.00

SKILLS

- Languages : PHP, Python, JavaScript, HTML5, CSS3
- Frameworks & Libraries : Laravel, CodeIgniter, React.js
- Front-end : JSX, Vite, Responsive Web Design
- Database : MySQL, Workbench
- Tools & Package Managers : Git, GitHub, FileZilla npm
- Other : REST APIs, Automation, Batch Processing, Database Querying

SELECTED PROJECTS

- SIDIK — Employee Discipline Management Information System, location-based attendance with role-based rules and event-based global settings.
- SISO — Online Satyalancana Information System, manages employee long-service award records.
- E-Kinerja PPPK — PPPK Performance Management System, supervisor-based performance evaluation for PPPK employees.
- Employee Data Management & Dashboard System, consolidated employee data dashboard for Human Resources reporting.

CERTIFICATION

Python Program — Professional Academy, Digital Talent Scholarship 2022, KOMINFO Indonesia
